## Advisory & Threat Intelligence

### Advisory & Threat Intelligence Service for Enterprise

Comae provides **high-end tailored** cyber security intelligence capabilities. Our client-specific cyber intelligence services include, as appropriate: research, investigation, analysis, mitigation strategies, threat modelling and remediation. We provide you with an on-demand **custom** threat intelligence capacity.

Gain privileged access to our team of **world class experts** to help guide your team, your company, your business through complex cybersecurity issues. Comae's renowned experts will provide insightful intelligence and analysis about your adversaries, threats and risks to help you better navigate today's challenging threat environment.

Our proven approach leverages our **decades of experience combined with critical thinking** and applies it to cybersecurity matters. In an era where threats evolve rapidly, where many policy and management methods are slow to adapt, access to trusted members of the information security community **will directly benefit the information security of your organization**.

This is not an automated Indicator of compromise (IOC) threat feed to buy, or a turnkey Threat Intelligence silver bullet box for sale. For us at Comae **intelligence is a customer needs focused capability**, not a product.

We offer a **tailored annual subscription** that provide your organization personal access to our team of experts that fits your budget and needs.

### About the Team

**Matt Suiche** is the founder of Comae. Prior to founding Comae, he was the Co-Founder and Chief Scientist of the application virtualization start-up CloudVolumes which was acquired by VMware in 2014. Matt has also been a frequent speaker to feature his research at various computer security conferences such as Black Hat Briefings, Microsoft Blue Hat Hacker Conference, Hackito Ergo Sum, Europol High Tech Crime Experts Meeting, CanSecWest, PacSec, Hack In, The Box, SyScan and Shakacon.

**The Grugq** is a pioneering information security researcher with two decades of experience. He's worked at Fortune 100 companies, leading information security firms and innovative start-ups. Since 2002 the Grugq has spoken, or delivered keynotes, at conference every year including BlackHat, HITB, SyScan, TROOPERS, and dozens more. The Grugq's domain expertise includes threat intelligence, privacy, digital forensic analysis, binary reverse engineering, mobile phone security, telecommunications and financial services security.

### About Comae

Comae Technologies is a privately-owned, elite grade cybersecurity firm that diagnoses and assess organizations from cyber-attacks through its memory hunting platform. Comae is also recognized by the financial industry as one of the pioneer companies in the field of Blockchain Security.
